the types of water flow...

Rain Shower

As the name suggests, the water from shower creates rain like effect giving both energizing and revitalizing.

Cascade Fall

Feel the soothing effect of water as it flows down in a cascade creating a revitalizing spa experience as you relax. The gentle sound and feel of water rejuvenates along with the powerful massage.

Mist Effect

Sort of surrounds you with a thick mist of tiny water droplets. There's no stream of water projecting toward you. The tiny droplets spread out inside the shower space and consume you. It's like a steam room, but one that, well, actually gets you clean.

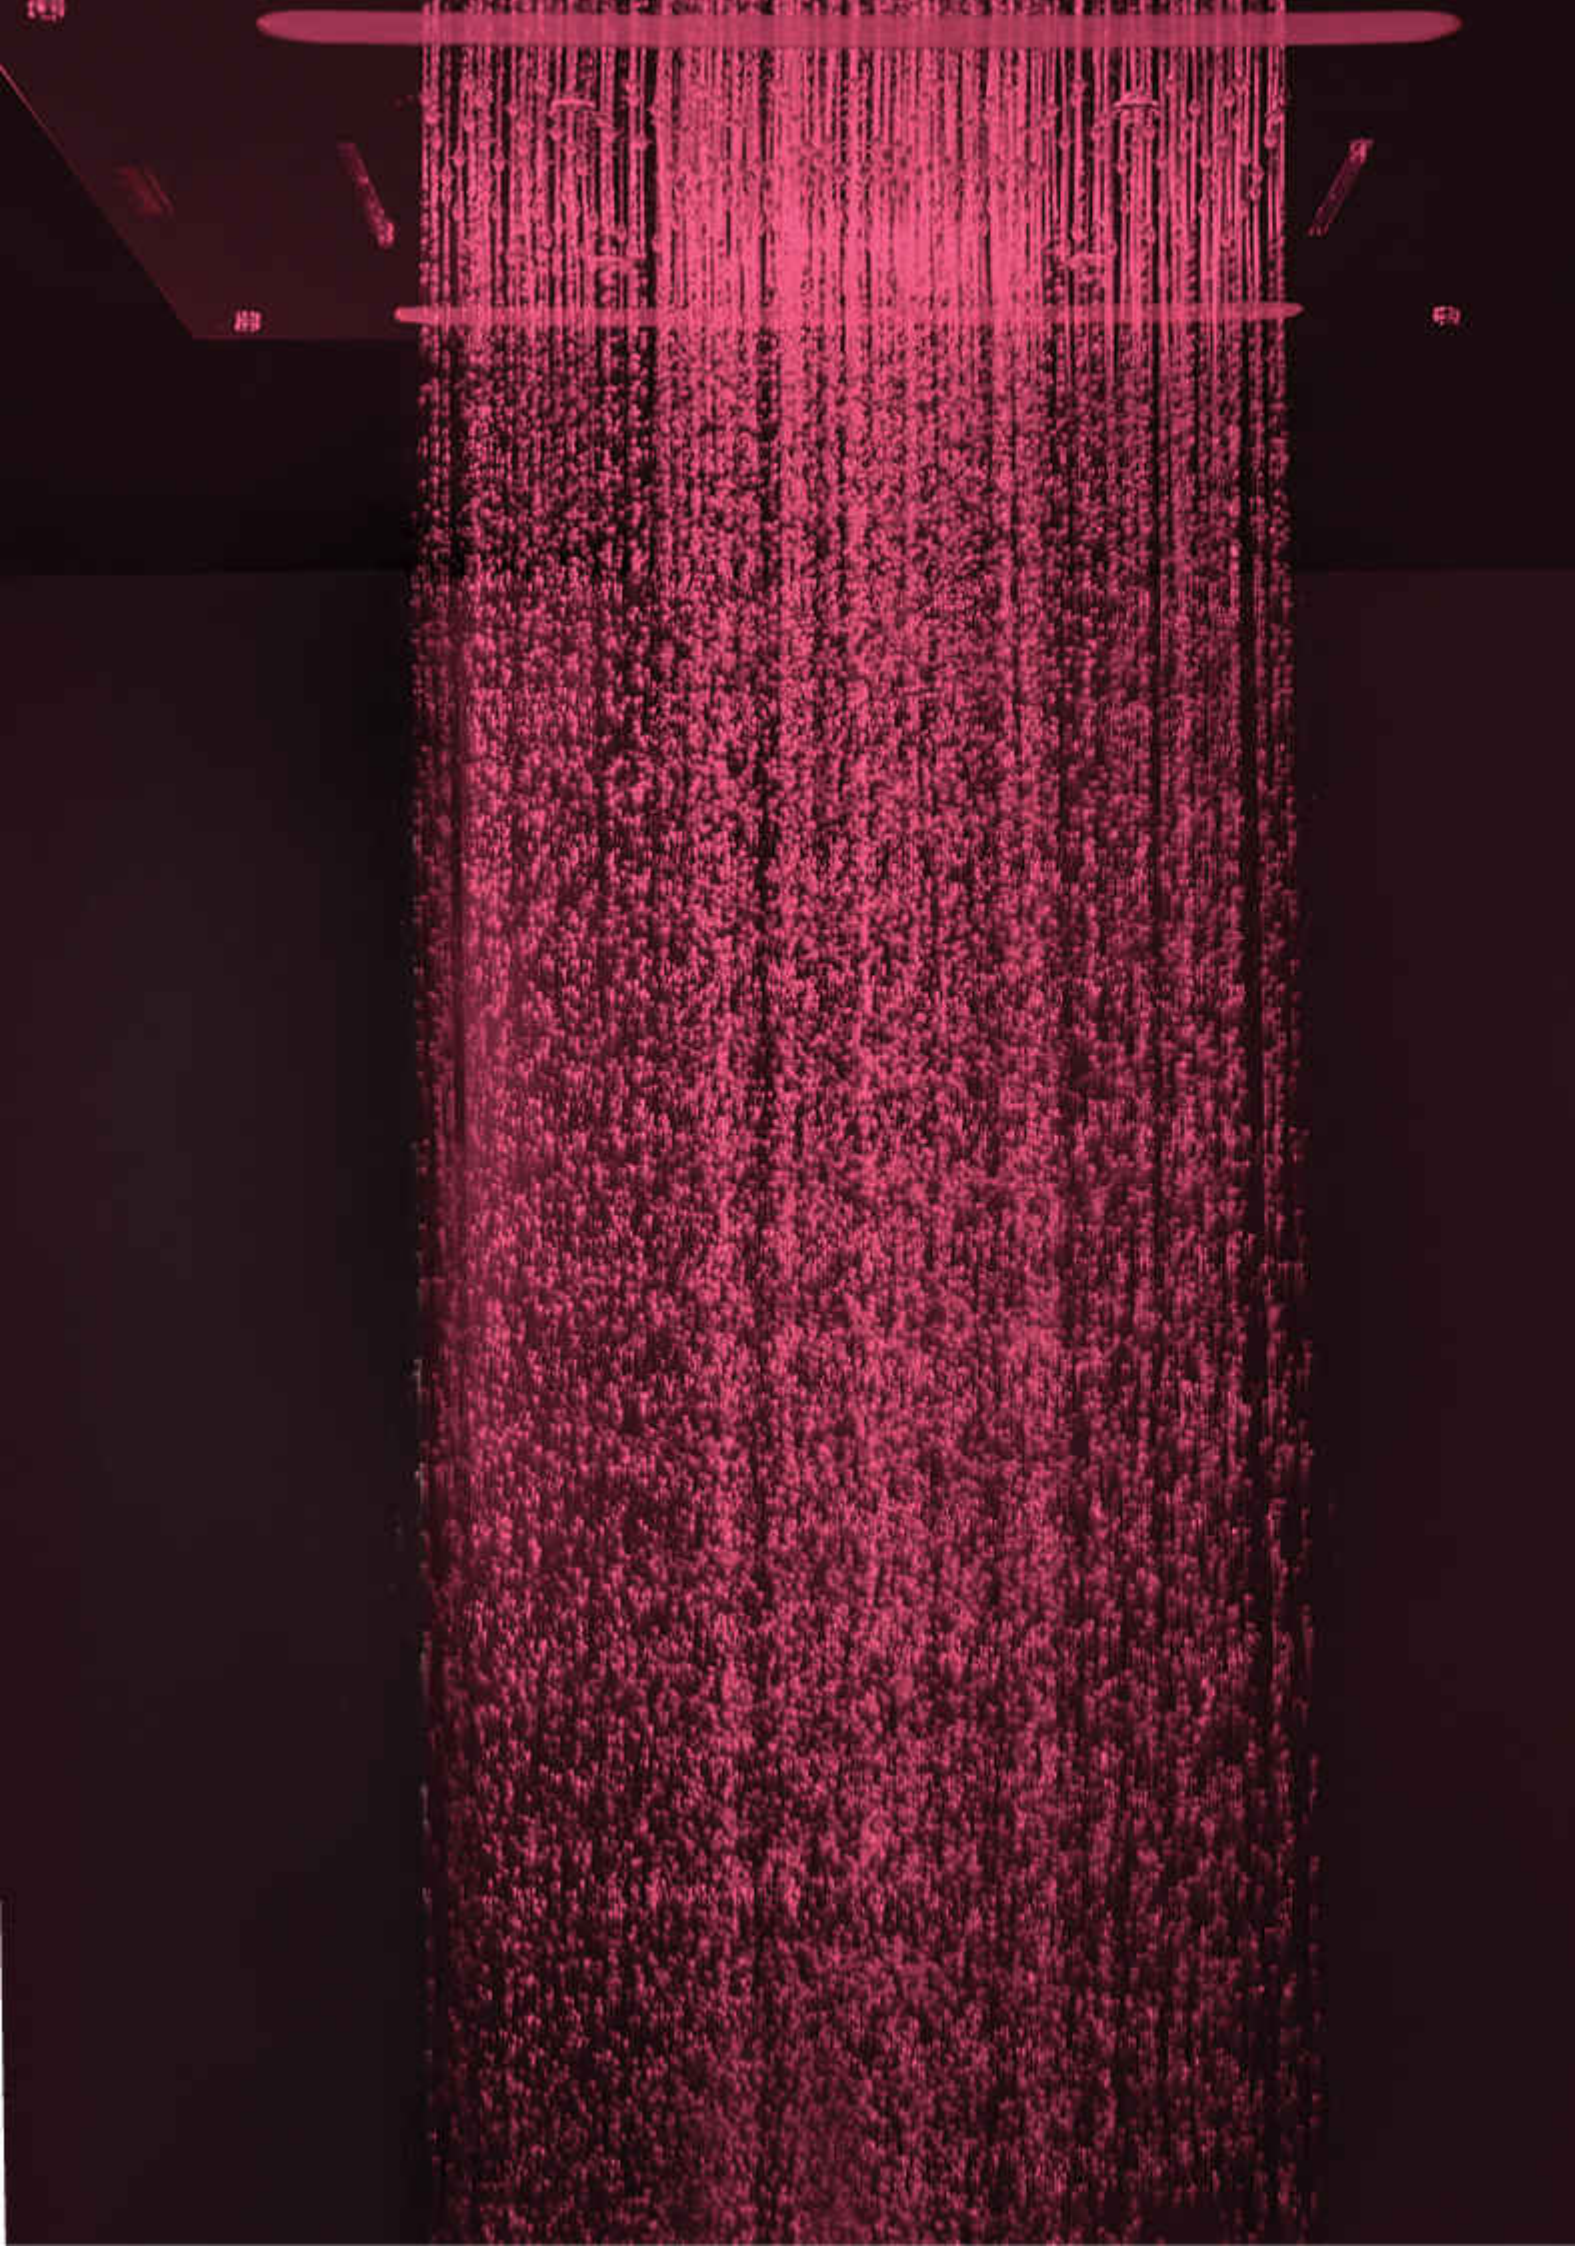

Intense Shower

A mode of shower which is produced at much higher pressure than rain shower and covers a specific area unlike rain shower. This mode is sure.

Remote controlled

Light effects with the **flow of water...**

The gentle flow of water is rejuvenating. As it flows, streaming down your body, it revitalizes. The relaxation is enhanced by the warm surrounding lights. Transforming the space around, light stimulates your mood. With a softening effect it imbues tranquillity. The placid sound of flowing water along with the pleasant lights elevates your senses invoking peace and harmony.

The multi functional shower is equipped with a multi-colour chromotherapy system. By means of the remote control you can choose a colour among red, green, blue, yellow, purple, blue, violet and white or even start the automatic transition from one shade to another. The chromotherapy system functioning is independent from the use of water.

Shower Meditation

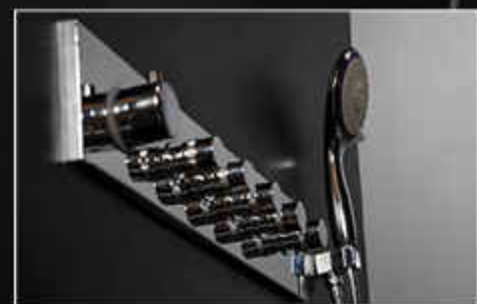

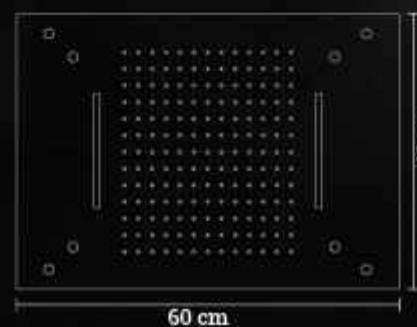

Every time you take a shower, visualise washing away your stress and anxiety. Concentrate on the field of the water on your skin. Envision the power of water washing away your negative thoughts. Feel sadness, regret, anger, and depression washing right off of you.

Let it go down the drain, you will start to feel lighter and much more clear.
